

A thick blue wavy line that curves across the top of the slide, starting from the left edge, dipping down in the middle, and rising back up towards the right edge.

# The NHS landscape and organ donation and transplantation

Sally Johnson  
Director of Organ Donation and Transplantation

# UK Overview

- Health is a devolved responsibility: 4 systems for agreeing strategy and funding.
- Major change in England:
  - Department of Health responsible for public health and sets objectives for NHS England (NHS mandate)
  - NHS England: separate body responsible for health services. Aims to secure high quality health for all. Focused on 4 programmes of improvement:
    - Reducing premature mortality
    - Enhancing quality of life for people with long term conditions
    - Helping people to recover from episodes of ill health or injury
    - Treating people in a safe environment and protecting them from avoidable harm

Ideas that change health care

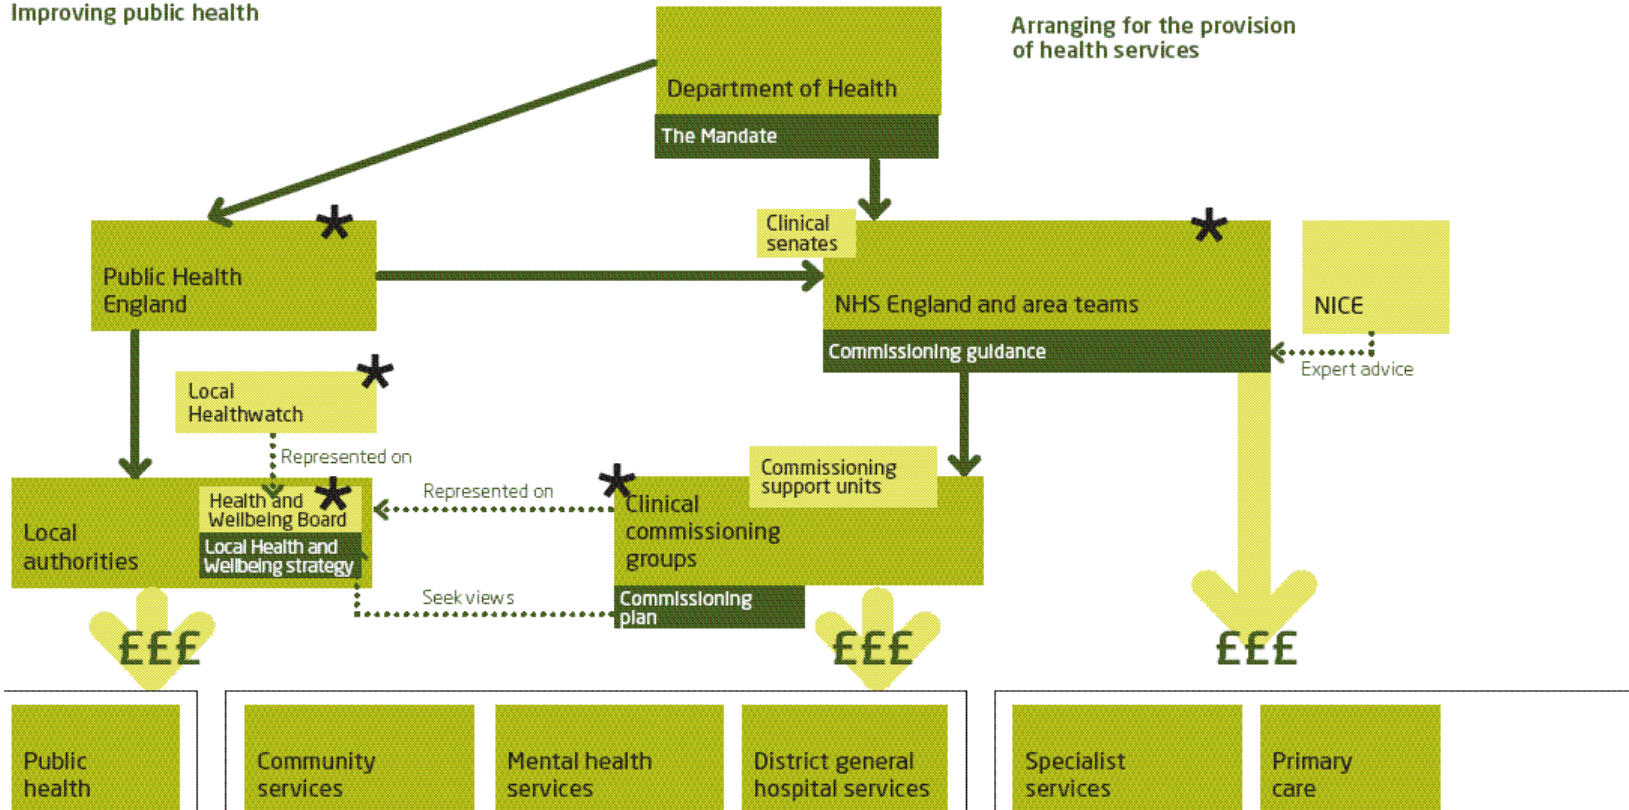

### The new NHS: Who can influence commissioning of services

key

- \* new organisations from April 2013
- Commissioning plan

Improving public health

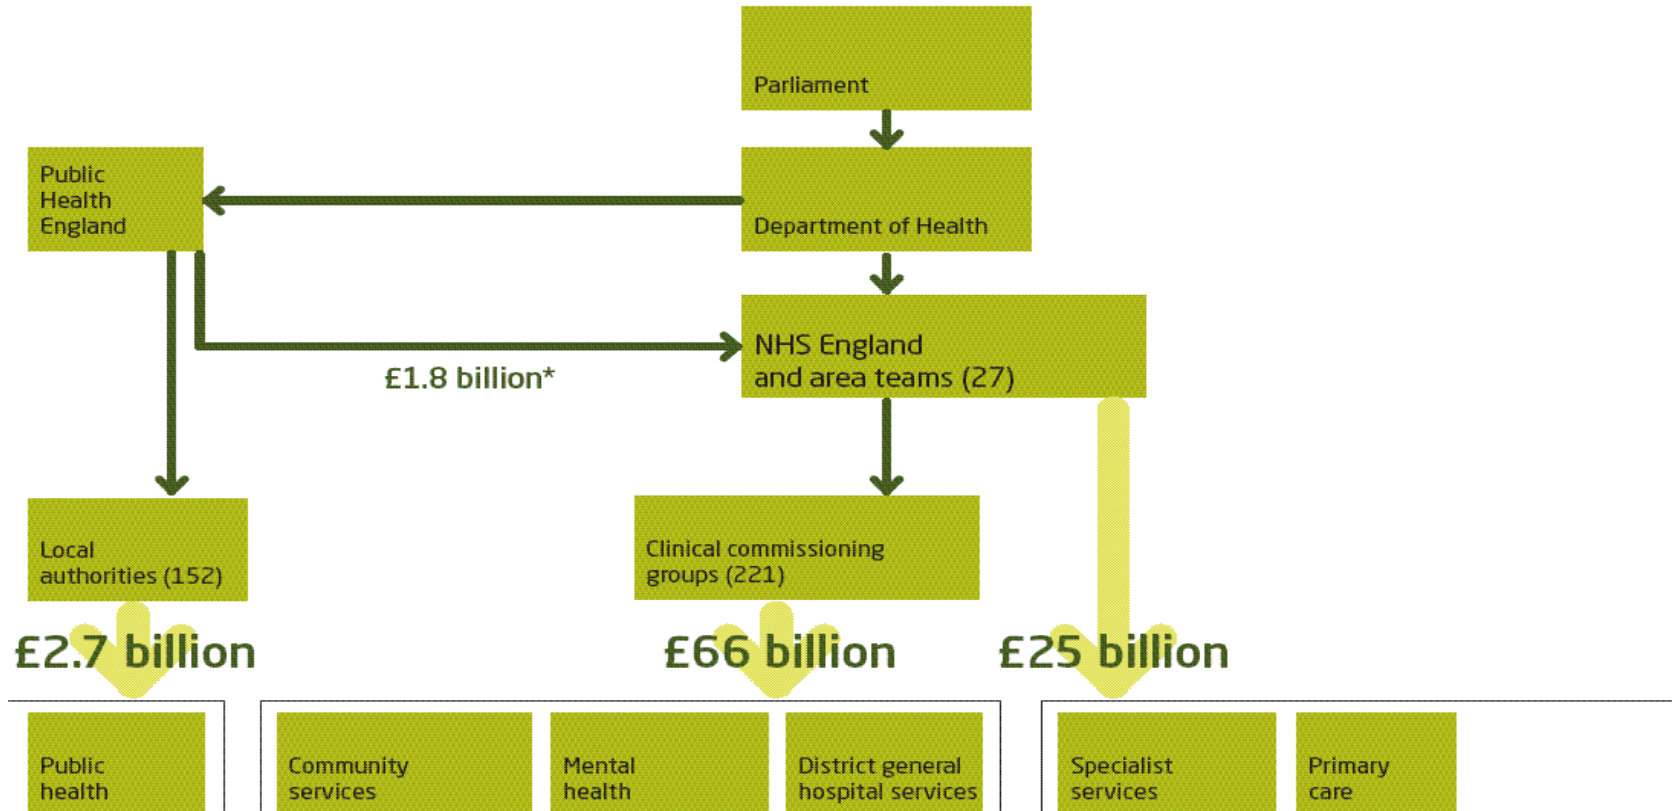

Arranging for the provision of health services

# Funding the NHS in England

TheKingsFund > Ideas that change health care

### How the money flows from April 2013

\* screening/immunisation programmes delivered in primary care

# NHSBT funding for ODT

*Blood and Transplant*

- Directly funded by all 4 Health Departments – total £70m (plus £2m other income)
- Funding based on country's population share
- Covers costs of donation service, selection and allocation system, retrieval service
- Excludes costs of deceased and living donor transplants & follow up: these are funded by NHS England and equivalents in other countries.
- Key issue: access to dialysis savings generated by increases in transplantation.

# Funding the patient pathway (England)

## Generic Patient Pathway – Organ Transplantation
